

# PicoToken Whitepaper

The Bird That Never Stops Flying

# Overview

PicoToken is here to set a premium standard to the crypto community. By developing a token that generates income for all holders. By expanding to multiple blockchains PICO will use the generated volume to create a portfolio with a system that allows the community to be involved in. Community involvement will play a huge role in the direction of Pico.

Anti-Bot mechanism: As Pico launches bots will be automatically spotted and removed. Allowing for a sustainable and healthy ecosystem for all holders.

Tokenomics: To further secure the future of the Token. A total tax of 17% will be issued. Firstly, 8% will be used for the liquidity. This allows for stability of the price floor to increase overtime. Secondly, 5% will go into marketing or development. This will further expand our ecosystem. Lastly, to reward the holders who believe in this organization. We dedicate passive income by using the last 4% to reflections.

8% Liquidity

5% Marketing

4% Reflections

# Ico & Launch

We will host a private sale on the Ethereum blockchain which will be followed by an ICO on Uniswap (Dex's), which will be used for to raise the liquidity pool. Furthermore, A portion of the ICO will be used for marketing & further advancements.

## Distribution:

**70% LIQUIDITY POOL**

**25% MARKETING**

**5% DEVELOPMENT**

# Roadmap

---

Contract deployed  
Social Medias  
Marketing

**Phase 2:** Daily AMA's  
Marketing campaign  
Influencers

**Phase 3:** List on CoinMarketCap  
List on Coingecko  
List on CEX's: Crypto.com Coinbase Binance  
Bitmart Kucoin Gate.io Saitamask

**Phase 4:** Portfolio Dapp Development  
Voting System Development  
Partnerships

\*Roadmap development changes based on community feedback of products releasing\*

# Ecosystem

---

The Pico Ecosystem is here to provide a safe and expanding environment to the crypto space. Many projects released in today's space have gone against holders, scamming those who hope for a source that can play as passive income. We are here to change this current dynamic of crypto.

Engagement with the community will play a huge role in the development of Pico. To revolutionize investing, we incorporate a system that puts money back into investor's hands. As we seek to outperform standardized index funds, implementing a Dapp protocol that allows for investors to analyze and propose between various commodities. For example, NFTS's, Crypto, Virtual/Physical Real Estate, and more.

Through the Dapp this will track investments, as well as providing a Voting gate. A snapshot will be taken to provide an overview of the community's proposition.

Investors will be able to share a portion of the profits made quarterly with Pico funds. These will be distributed as a buyback or we will increase the liquidity raising the floor of the token.

# Development

Pico is here to develop the essentials needed for the ecosystem. By Developing a multichain token, wallet, and swap. This sets a necessary foundation to bring in volume circulating into the business.

The development of the wallet will allow users to toggle between offline and online. Many wallets today either need to be purchased to attain a “offline” feature or don’t provide an offline feature. Providing this feature will allow enhanced security, toggling between online and offline will use a 2FA system, as well as a seed phrase recovery system enhancing maximum security. The wallet will also allow you to store all Tokens and NFT collections across different block chains.
